

1. As a resident of the local community, Air 1 serves me with positive and encouraging music and messages that help me keep a positive attitude, moral uprightness, and therefore, a better asset to my local community.

2.If Air1 were to be displaced by an LPFM broadcaster providing other programming, the local community as a whole would be effected. There are so many people in this community that listen to Air1 exclusively. This would force many to listen to secular radio as there aren't any other stations of this sort.

3. The service provided by Air1 is in the public interest for obvious reasons, which I've already stated. Positive, uplifting, encouraging, and up-beat music and messages which still one's soul and mind. Please, please, I beg of you...take the time and have an open mind, try to see how much this benefits the public as a whole. There are so many listeners, including myself, who would be so disappointed if we woke up one morning & tuned in to our local Air1 station and weren't able to hear it anymore....please, again, I ask of you.....keep Air1 on the air!!!!!! Thank you and God bless you for using your power for good!!!!
